## AIR KNIFE DRYING SYSTEMS

*For Canning & Bottling*

## PRECISION DRYING SYSTEMS FOR CANNING & BOTTLING

are designed based on decades of experience. Tailored to production speeds from **200 to 1500 cpm**, these systems effectively dry **aluminum cans, jars, glass bottles, and PET bottles up to two liters in size**. Meticulously engineered, manufactured, and tested, they ensure the removal of liquid, dust, and debris before proceeding to labeling, inkjet laser coating, packaging, or other subsequent operations.

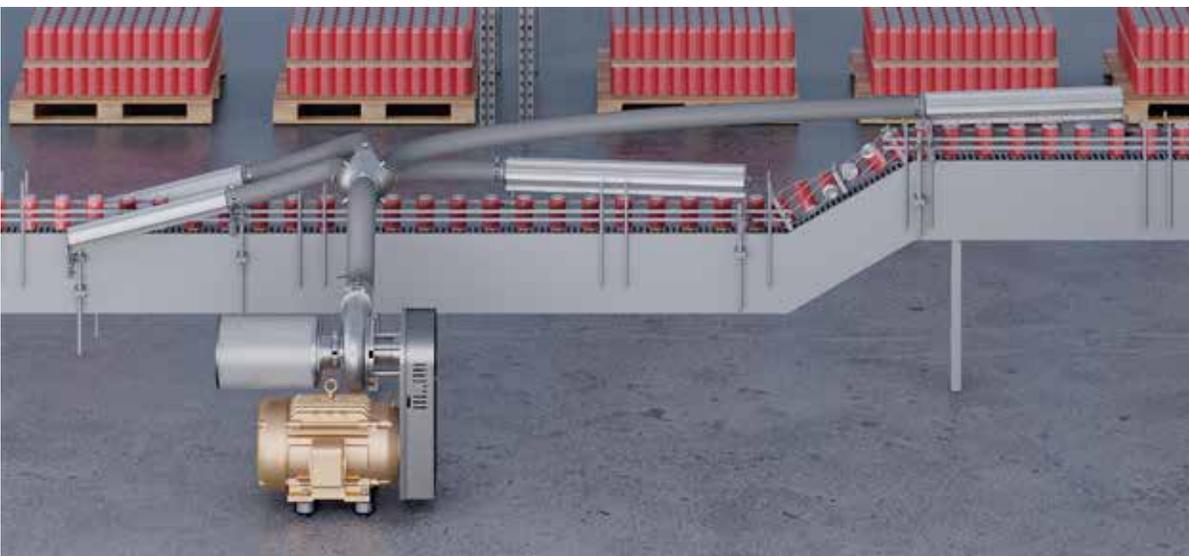

Republic Centrifugal Blowers are a cost-effective alternative to compressed air, and provide clean, dry, oil-free air at lower operating costs. The RB-Series has been proven to be reliable across a wide range of applications and industries. The **best-in-class RBX-Series** significantly **reduces operating costs**, achieving **80% peak efficiencies**, and offers up to eight times **longer bearing life** than standard blowers, ensuring durability and long-term cost-effectiveness.
