Tampa, FL 33619

John/Chris,

Just wanted to drop you a quick note and thank you for the excellent experience of working with you and your organization. In this day and time it seems we only hear the negatives and very rarely will someone take the time to give the positives. I personally would like to tell you thank you and what an outstanding job done by all within your organization. It started at the top with you two and your fast response and the great communication you showed and it then extended down to the installation team as well as the startup technician. They each continued with great communication, quality workmanship and a hard work effort that resulted in a successful project. It is a true pleasure to work with a professional organization that is still a business that has to make a profit but really does seem to care about the customer and ensuring that they get a fair price but also a quality product and services.

Thank you again for a job well done and I wish you and your company much continued success.

Sincerely,  
Lee A. Heine  
VP of Gulf Coast Operations
