To Whom it May Concern;

I am pleased to say that my manufacturing company has been a customer of Compressed Air Systems, Inc. since 2002. I have added multiple KAESER compressors throughout the factory over the years. I recently added an additional KAESER SK-15 to my arsenal with the help of Chris Armstrong. Purchase to delivery and installation was seamless.

Our KAESER compressors are workhorses, they are vital to the day to day operation of my business. They run all day, every day, powering: pumps, paint guns, sanders, and grinding stations. When I do need service, it is hassle free. I simply call the service department and they send a uniformed professional technician. The technicians are prompt and courteous as well as extremely knowledgeable.

Sincerely,

Bob Smetts
