

RBX-150

RBX-250 in Enclosure

80% PEAK EFFICIENCY

The optimized design requires less power consumption, thus reducing energy and operating cost.

ADAPTABLE

The rotatable blower discharge allows the blower to operate in multiple configurations. RBX blowers are operational with NEMA or IEC motors, including washdown, explosion proof, and inverter duty.

EASY MAINTENANCE

Quick-release filter and easily-accessed bearing housing assembly makes this blower easy to maintain.

LONGEVITY

New bearing arrangement and different bearing grease provides 7-8 times more bearing life than typical centrifugal blowers.

DESIGN EVOLUTION

- CFD-designed impeller and volute
- Optimized bearing design for increased reliability
- Two-piece labyrinth seals specifically designed for RBX blowers

WARRANTY

Total quality management ensures exceptional operation, and all RBX blowers come with a two year warranty.
