

Environmental Services Department Company
City of Largo, Florida
5100 – 150th Ave
Clearwater, FL 33760

We were having issues with our aging air compressor and in need of replacement. We searched compressor companies online and found *Compressed Air Systems Inc.* located in Tampa, Fl. After calling the number, I was immediately connected to a salesperson — Bo Wenrich of *Compressed Air Systems*, who showed up at my location within an hour.

We went over what was needed for our system and how long it would take to get a replacement and installation. John, the Installation Supervisor, looked at the job later that day and a quote was provided the next day. After all bids were entered, *Compressed Air Systems* was awarded the bid.

The inside sales rep, Jack, stayed on top of all communication, making sure the unit arrived on time and had delivered to the location in Tampa for all to be coordinated. *Compressed Air Systems* took care of all coordination between a Contracted Electrician and installation group. The installation group, Tanner and Rick, worked in a very professional and workmanlike manner. They removed the existing equipment and installed the New Unit/Dryer and Piping in less than 8 hours. Bo was there during the installation, started up the unit and provided service training to our service guys.

I would recommend *Compressed Air Systems* to anyone that was looking for a Quality Turn Key Experience!
